

AIR CLEANER FASTENER INSTRUCTIONS

Parts included:

1 Fastener

These are replacement accent fasteners for the acorn nut that comes with the OUTLAW HiFlow 587 Air Cleaners. They work with the stud (except the 44 Magnum style that has it's own stud).

They can work with other brand air cleaners, but you will need to get a 1/4" - 20 stud to replace the screw.

Instructions:

Remove the acorn nut and replace with fastener. The "Tri" fasteners have dual female threads, you will need to back out the stud from the air cleaner so that it will reach into the smaller 1/4" threads that sit deeper in the fastener.

The 44 Magnum fastener requires the stud to be removed from the air cleaner.

General Notes:

- The riders safety depends on the correct installation of this kit. Please do not attempt if you have any doubts of your ability to install.
- **It is VERY Important that blue thread locker be used on all threads**
- The 44 Magnum Fastener has no flat surfaces. This can make tightening AND loosening this fastener a bit of a project. A little ingenuity and care will get it done. If you scratch it, it is brass so you can polish it out.
