

UPPER FORK COVERS *for 39mm Forks*

INSTRUCTIONS

(Please read all instructions before beginning install)

Parts included:

2 Fork Covers
for 39mm forks

Installation Steps:

1. Clean your upper forks
2. Wrap the Fork covers around the upper fork, pulling it snug and attach in place with the velcro in the back and toward the frame for the least visible seam.
3. If you need to cut it down to fit, use a straight edge (like a ruler) & a sharp utility knife to get a good clean cut. Make sure to sew/double-stitch the part of the stitching that was cut, so there is no unraveling. Put the cut side toward the bottom of the fork..
4. Go for a ride!
