

Honeycomb Cut Shift Peg

Fits All Harley's & Most other Motorcycles

INSTRUCTIONS

Parts included:

1 Shift Peg

Installation Steps:

1. Remove existing shift peg
2. Install your new Shift Peg by threading it into the stock lever. Please make sure to use thread-locker and allow it time to set-up.
3. Go for a ride!

General Notes:

- The riders safety depends on the correct installation of this kit. Please do not attempt if you have any doubts of your ability to install.
- We recommend blue thread locker be used on all threads.
- This peg can also be used as a brake pedal. This will generally require cutting off existing brake pedal and tapping brake lever for bolt. Alternatively a hole can be drilled and a longer bolt and nut can be used to secure the new brake pedal.
