

Curved Axle Mount License Plate Relo

Made in The USA
DK Custom Products

(Please read all instructions before beginning install)

Parts included:

- 1- Curved Axle Mount License Plate Bracket
- 1- Set of (4) Button Head fasteners with (8) flat & (4) lock washers, & (4) nuts

Instructions:

1. This License Plate Bracket that allows you to mount your license plate on the Left side.

Note: In the following step make sure to install the bracket flush against the swingarm with the factory washer between the nut and the bracket.

2. Remove the retaining clip and axle nut, set aside for later use.
3. Depending on your year and model it may be necessary to remove your axle completely to get the desired orientation of the Relocation Bracket. If this is necessary reference your service manual for that portion of the installation.
3. Install the mounting arm in place and hand tighten the axle nut so the Mounting bracket does not freely spin.
4. At this time make sure you have the arm at the angle you want your plate to be at. Tighten to torque settings specified in your manual while making sure the bracket stays in place and reinstall retaining clip.)
4. If you are using the optional Run/Brake Led reference the instructions supplied with that item at this point.

5. Using the 4 supplied sets of bolts, nuts, and washers, attach your tag to the tag bracket. If not using the optional Led light you will want to center your license plate on the bracket. (There will be a small amount of the bracket sticking out on either side, this is normal and by design.) Torque to 15-20 ft-lbs.

5a. If you are using a bolt light you will use three of the supplied sets of fasteners above and the optional bolt light to attach your license plate. (Typical placement of bolt light is top of plate, away from bike.)

Important Notes:

- The rider's safety and product warranty depends on the correct installation of this bracket. Please do not attempt if you have any doubts of your ability to install.
- If wiring the optional light to your bike, make sure to make good connection and to carefully route & insulate to avoid grounding out.
- Be aware of your local law enforcement. Some areas do not allow vertical mounting of a license plate.
- **Blue Thread locker (medium) MUST be used on all threads. Not using Thread Locker could result in damage to your bike or plate.**
